

My favourite finds from Urbis Design Day 2015

Wow! Lighting was the shining star of the night...

Positioned in the entry of Backhouse Interiors were these gorgeous colourful David Trubridge lights. Constructed from plywood, each light interior is painted a different colour whilst the exterior is left natural.

A myriad of geometric shapes and colours are sprayed across the wall. These lights would look fabulous in the foyer of a modern home.

Another noteworthy find from Backhouse Interiors was the PET Lamp. This light has heart and soul! Made from trash (recycled plastic bottles) and woven, through traditional means, by those in need. It's available in 4 sizes and can be ordered in groups or individually.
